

AMENDMENTS TO THE ABSTRACT

Replace the Abstract with:

~~The invention relates to a~~ A control for an excimer emitter, particularly for the dryer in a printing press, ~~comprised of~~ comprises an HF generator that is connected on the output side to an excimer emitter. ~~The aim of the invention is to improve the design of a control of this type for an excimer emitter as to~~ To enable a higher UV intensity of radiation, ~~To this end, the invention provides that:~~ the HF generator (1) is provided in the form of a tube-type generator with a feedback: the output of this HF generator (1) is connected to the input of a working circuit (3) comprising a capacitor (C) and an inductive resistor (L), and; the excimer emitter (5) is connected to the output of the working circuit (3).
